US Army Corps of Engineers  
Washington, DC 20314

EM 1110-3-130

Engineer Manual  
No. 1110-3-130

9 April 1984

Engineering and Design  
GEOMETRICS FOR ROADS, STREETS,  
WALKS, AND OPEN STORAGE  
AREAS  
Mobilization Construction

	<u>Paragraph</u>	<u>Page</u>
<b>CHAPTER 1. GENERAL</b>		
Purpose and scope . . . . .	1-1	1-1
Definition of pertinent terms . .	1-2	1-1
Highway planning . . . . .	1-3	1-1
Traffic . . . . .	1-4	1-2
<b>CHAPTER 2. DESIGN CONSIDERATIONS</b>		
General . . . . .	2-1	2-1
Road and street types . . . . .	2-2	2-1
Design controls . . . . .	2-3	2-2
Speed and capacity influence . .	2-4	2-4
<b>CHAPTER 3. GEOMETRIC DESIGN FOR ROADS AND STREETS</b>		
Cross-section elements . . . . .	3-1	3-1
Curbs, combination curbs, and gutters . . . . .	3-2	3-1
Road and street appendages . . .	3-3	3-2
Sight distance . . . . .	3-4	3-6
Horizontal alinement . . . . .	3-5	3-7
Vertical alinement . . . . .	3-6	3-8
Cross section . . . . .	3-7	3-13
Intersection criteria . . . . .	3-8	3-13
Capacity of intersections . . . .	3-9	3-16
Intersection curves . . . . .	3-10	3-17
Miscellaneous . . . . .	3-11	3-18
<b>CHAPTER 4. GEOMETRIC DESIGN FOR WALKS AND OPEN STORAGE AREAS</b>		
Walks . . . . .	4-1	4-1
Open storage areas and parking .	4-2	4-2

9 Apr 84

APPENDIX A. REFERENCES

Paragraph Page

A-1,

LIST OF FIGURES

- Figure 3-1. Cross sections of general types of medians.  
3-2. Design criteria: guardrails, guideposts, and earth slopes.  
3-3. Method of layout of widening and superelevation of spiral lanes.  
3-4. Stopping sight distance on horizontal curves, open road conditions.  
3-5. Types of vertical curves.  
3-6. Typical road-type cross sections.  
3-7. Typical street-type cross sections.
